

Information on Adverse Events

Adverse events are undesirable effects that occur after the use of a medication, medical device, pesticide, or vaccine or other biological product. They may, or may not, be caused by the product or device. Adverse events are rare and the majority of them are minor, but some can be life-threatening.

Side effects that are listed on your patient information sheet are **not** considered an adverse event.

If you feel that you have an adverse event while taking the provided prophylaxis, please contact your local health care provider or go to the emergency Room.

If you not have a health care provider, you may report the adverse event to the Shelby County Health Department, 317-392-6470.
